

## A Large Commercial Development in Ireland

### Our Rebar Project To Explore

#### About The Project

Redevelopment of an old commercial centre site to create a Company Headquarter Campus. The development included demolition of office blocks and the development of 6 storey office buildings over three levels of basement.

#### Project Scope

Preparation of RC Shop drawings along with BBS for following:

- Foundations
- Basement to Sixth floor slab
- Columns
- Core Walls
- Retaining Walls
- Roof Level Slabs
- Metal Decks

## Software

- AutoCAD with CADS-RC

## Our Challenges & Solutions

### Challenges:

- The project had a tight deadline and had to be fulfilled quickly. We had to prepare RC shop drawings and other BBS as mentioned in the scope above. We put in our expertise & teamwork to get this job done.

### Solutions:

- The project had to be completed in a short period. We had created and shared a delivery schedule splitting the project work in such a fashion that customer & Pan Gulf were both able to work and share mark-ups simultaneously without hampering the deliverable milestones and quality.

## About Us

Founded in 1999. We are a multi-disciplinary engineering solutions company with offices in the USA & India. Delivering BIM, Rebar, Steel, Precast, Plant Engineering Services & Solutions for Commercial, Industrial, Infrastructure & Residential Projects. Get in touch with us to help you boost your profitability, project delivery schedules with quality, and efficient engineering solutions across all your projects.
